

MetroMedic

by Road Rescue®

Road Rescue®

In Service for Life™

AN ALLIED SPECIALTY VEHICLES COMPANY

A Composite Interior – Our composite material used to construct the interior cabinets and floor resists fluid borne pathogens and provides over twice the insulation value when compared to wood. It is a non-toxic, synthetic material that can be customized to meet each customer's needs.

B Module Construction Strength & Safety – Our all aluminum module body has been tested in frontal, corner, and side impact tests, proving its structural strength and integrity.

C Action Area Countertops – Our countertops are made with Avonite, a durable product that is seamless, easy to clean and resistant to biohazards. We recognize the health risks that the crew and module are susceptible to during patient care and we are focused on using material that helps to alleviate fluid from seeping into the Road Rescue module.

The MetroMedic is loaded with options while being highly affordable.

MetroMedic

by Road Rescue®

Road Rescue pioneers new features that allow emergency personnel to provide effective patient care in a safe, secure environment. When you choose Road Rescue, you know you're getting the safest, most innovative ambulances in the industry with features designed to provide a secure environment for patient care and occupant safety.
